

2004 email from mill to Harvey with a copy of the official  
USEPA Superfund priority ranking: Whitestone

Ranking shows that EPA decided no further remedial  
action was required (2003 entry into the database).

**To:** templetonHM (E-mail); Bartle, William E. (Calhoun)  
**Subject:** Whitestone Site Info, FYI

I checked the US EPA website to see the latest info they might have.

They have an action entry dated 9-29-03. The action was "Combined PA/SI" (preliminary inspection / site assessment). The lead agency was "S" (state). The qualifier was "N" (no further remedial action planned). I will send you a copy.

As we already knew, the Whitestone site is an "archived" site, which means it has low priority.
